APPAREL & FOOTWEAR

LIVING  
**FAST IN THE  
MOUNTAINS**

Lorenzo Delladio  
CEO

Muévete rápido por el monte, algunas veces incluso más allá de los caminos marcados, superando a toda velocidad los obstáculos que te encuentres; detente a escuchar el latido de tu corazón y realizar una respiración profunda antes de partir de nuevo en busca del siguiente hito. Vive el mundo de las carreras con la mirada puesta en tu próxima cima, todo ello con la experiencia acumulada en tu mente y hasta debajo de tus pies.

Vive “Fast in the mountains” como filosofía de vida que lleva practicando La Sportiva desde hace 80 años, desde sus inicios cuando el abuelo Narciso, seguramente poco consciente de la semilla que estaba sembrando, reparaba a toda velocidad el calzado de los leñadores.

“Fast” es la manera en que Francesco Delladio se ha movido de una innovación a otra, con el objetivo de producir el mejor calzado posible para todo tipo de condiciones. **Rápidamente cambian las tendencias**, donde La Sportiva se esfuerza para anticiparse y dominar.

**Conscientes de esta velocidad**, pero sin perder la calma, siendo responsables de cada movimiento

meticulosamente estudiado; similar al de los atletas en carrera donde parecen superar las dificultades de forma sencilla.

La colección “**Fast**” está inspirada en todos estos conceptos y se expresa en la nueva categoría apparel dedicada al mundo del **RACE** y la categoría footwear, albergando todas las maneras de entender el trail running.  
**Ahora a correr.**

To move quickly over land, sometimes far from the beaten track, to run rapidly over obstacles, stopping to listen to ones own heartbeat, taking a deep breath before heading off again for the next milestone. To live the world of racing with eyes upturned to the next summit, with the experience gained on the road that lies behind both **in the mind and under foot**.

Living “**Fast in the mountains**” is what La Sportiva has been doing for the past 80 years, since the early days when grandfather Narciso, probably unaware of the seed he was sowing, first started his quick clog and boot repair service for lumberjacks; “Fast” is the way of life for Francesco Delladio as he

moves from one innovation to another with the aim of producing the best shoes possible for all types of foot. Rapid, are the **constantly changing trends** that La Sportiva strive to anticipate and dominate.

**Speed conscious**, yet never in a hurry, every move no matter how instinctive it may seem, is reasoned and meticulously studied, similar to athletes in a race who make difficult tasks seems so easy.

The “**Fast collection**” draws inspiration from these concepts which is evident in the new apparel line dedicated to RACE and in every single product of the footwear line, dedicated to all types of trail running.

**All you have to do is run.**

## ENVIRONMENT & SOCIAL CARE

La Sportiva ha estado operando por más de 85 años en el fascinante entorno de la **Val di Fiemme**, a los pies de la UNESCO, patrimonio de la Dolomitas. Esta ubicación trae consigo una responsabilidad social y ambiental en la que la empresa cree firmemente y a través de los métodos y procesos de trabajo de bajo impacto ambiental e **ISO 9001 y 14001**, ha dado siempre la máxima prioridad a la búsqueda de un enfoque **medioambiental respetuoso del medio ambiente** tanto como sea posible: a través del reciclaje de residuos de la producción, la producción de energía con paneles foto-voltaicos solares, el filtrado de las emisiones de CO<sub>2</sub> y el uso de energía procedente de fuentes renovables al 100%. La compañía también ha implementado procedimientos para certificar el proceso de producción de acuerdo con los criterios sociales y ambientales y se convirtió en el 2012 **Bluesign® Member** presentando los **primeros productos enteramente certificados Bluesign® en el 2014** [base layers, colección apparel]. Desde 2013, la compañía **apoya a una organización internacional sin fines de lucro EOCA**, que anualmente apoya la financiación de proyectos de conservación fundamentales para el ecosistema global. Líder en el segmento de calzados de escalada, La Sportiva con sus atletas "testimonials" está también junto ADMO con el desarrollo del proyecto **Climb For Life** y junto con la Asociación Internacional **Climbers Against Cancer**.

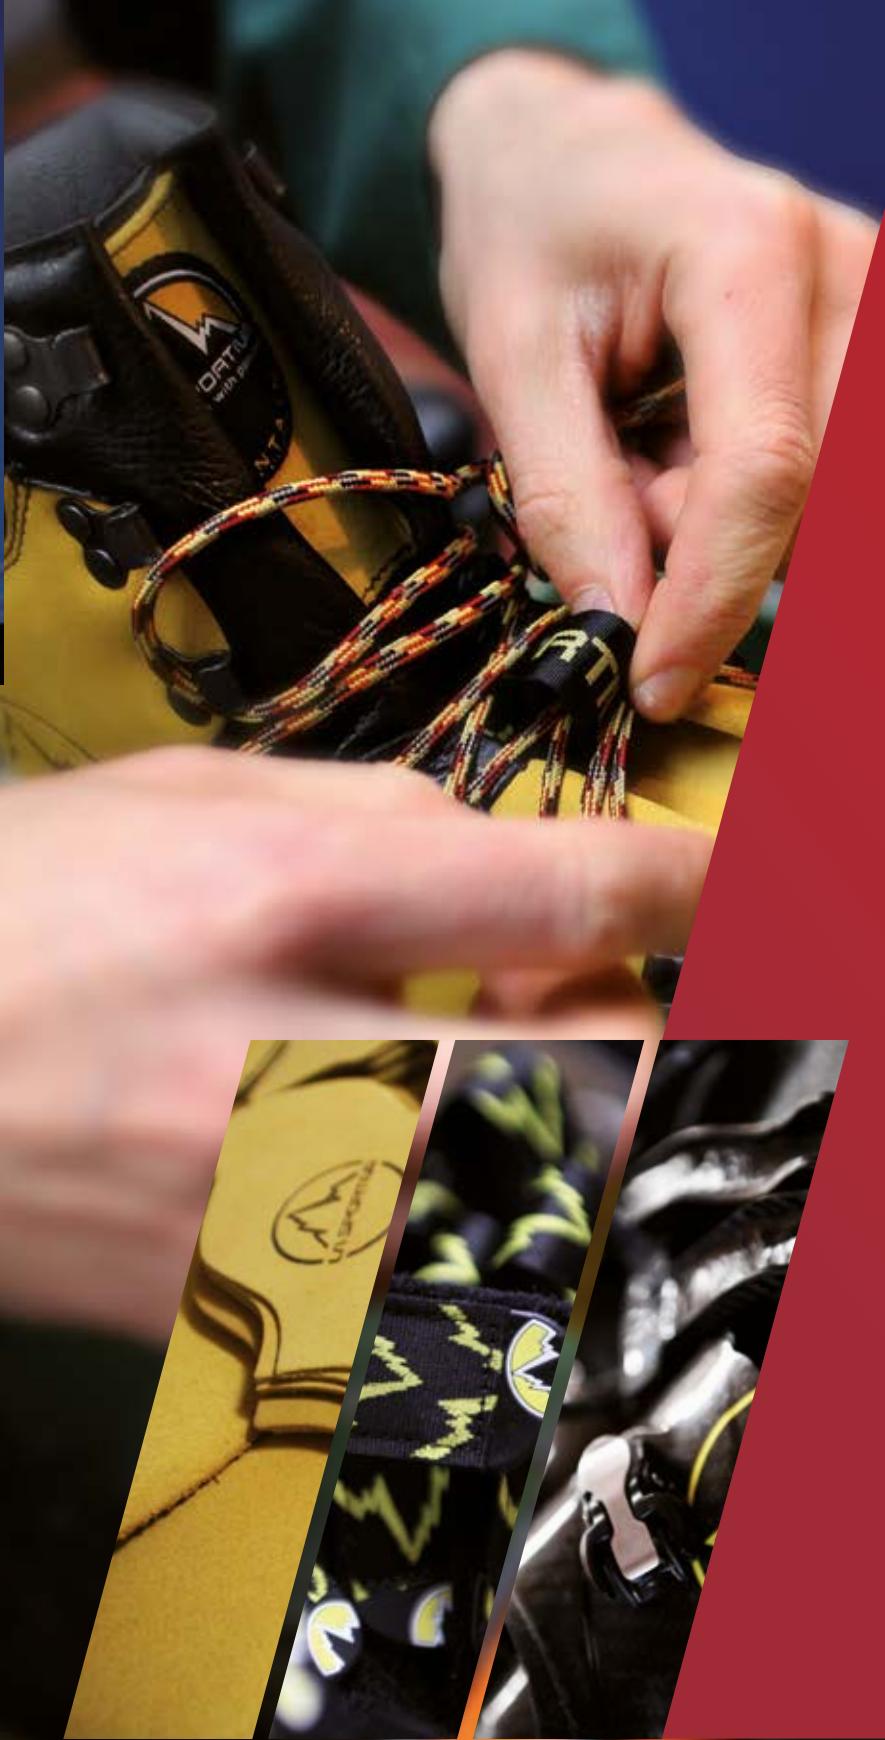

For over 85 years, La Sportiva has been located within the fascinating scenery of **Val di Fiemme**, at the foothills of the Dolomites - the natural heritage of humanity.

Such an incredible location brings with it an intrinsic social and environmental responsibility which is strongly felt within the company. By adopting specific low impact production procedures and the **ISO 9001 and 14001 certifications**, La Sportiva continues to put respect for the environment in primary position.

Eco friendly production procedures are employed at all levels including the recycling of production waste material, use of photovoltaic and solar panels to produce energy, the filtering of CO<sub>2</sub> emissions and the use of 100% renewable energy sources. The company has also introduced procedures which meet international socio environmental criteria, and in 2012 became a **Bluesign® Member**, presenting the **first entirely Bluesign certified products in 2014** [base layers, apparel collection].

Since 2013 the company has supported EOCA, the international non-profit organization which provides financial projects for the environmental conservation crucial to the worldwide eco system. World leader in the field of climbing shoes, La Sportiva's testimonials are also supportive of ADMO with the project **Climb for Life**, which supports the International association **Climbers against Cancer**.

# MOUNTAIN RUNNING FOOTWEAR

Whether it's muddy and uneven ground, uphill running on hard terrain or marathons that last for days: for each challenge we have a specific product.  
**All you have to do is run.**

# LA SPORTIVA TECHNOLOGY

El contenido tecnico de cada modelo desarrollado por La Sportiva, son el fruto de procesos de investigacion y desarrollo originados del continuo intercambio del departamento R&D de La Sportiva y los mejores atletas a nivel internacional. Nace así las diferentes tecnicas constructivas, la tecnologia y los cuidados tecnicos que hacen a cada producto unico e insustituible.

The technical contents of each La Sportiva model are the fruit of indepth research and development, originating from the constant exchange of information between the R&D department at Ziano di Fiemme (TN) and some of the world's best athletes. Each shoe is developed using different construction techniques, technologies and technical details which makes each product unique and irreplaceable.

## 1] IMPACT BRAKE SYSTEM

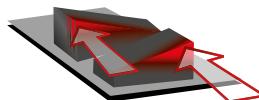

Impact Brake System es el sistema innovativo aplicado a la suela que absorbe el impacto, ayuda a la tracción y retiene en el descenso. Concebido y desarrollado en el departamento de I&D de La Sportiva®, en colaboración con Vibram®, esta suela presenta ventajas reales a los practicantes, reduciendo el impacto negativo con el terreno gracias a la particular inclinación de los tacos de la suela.

The innovative system is applied to the sole to absorb negative ground impact, help traction and improve grip downhill. Created and developed by the R&D department at La Sportiva, it offers real advantages during racing by reducing negative ground impact. The unique position of the lugs allows as many of them as possible to come into contact with the ground, for maximum impact absorption.

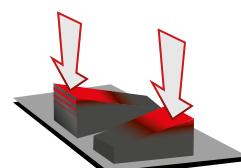

### BRAKE

- Mayor efecto de frenada
- Mayor tracción
- Enhanced braking effect
- Enhanced traction

### IMPACT

- Mayor absorción del impacto
- Menor fatiga de las articulaciones
- Enhanced shock absorption
- Reduced articulation fatigue

## 2] FriXion®

FriXion® existe en distintas mezclas formuladas específicamente para obtener la máxima performance. Para cada deporte de alto nivel en montaña se puede contar con la suela FriXion®. La gama FRICTION esta compuesta por 4 tipos diferentes de mezclas:

The La Sportiva Frixion® stem arose from the desire to create outsoles with increased parametres of hold and durability. This will decline on the basis of types of use and terrain. The frixion range consists of four different types of rubber:

FRICTION RS

Mezcla ultra-adherente para la máxima performance en escalada  
Ultra sticky rubber compound for maximum performance in climbing

FRICTION XF

Mezcla versátil y ultra adherente  
Very sticky, versatile rubber compound

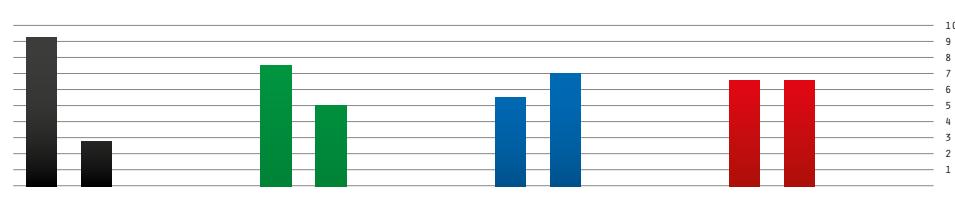

FRICTION AT

Mezcla blanda y ligera, no marcante adaptada a la carrera en ruta  
Soft and light rubber compound, non marking, ideal for running on roads and trails

FRICTION XT

Utilizada en suelas de doble densidad. Perfecta combinación entre adherencia, resistencia al uso y blandura al impacto  
Used on dual rubber soles. The perfect combination of grip, durability and shock absorption

G = GRIP

HW = HARDWEARING

AKASHA

Suela versátil, ideal para todo tipo de terrenos incluyendo piedra, tarteras, hierba, musgo y barro. Ideal para correr tanto en terreno húmedo o seco. Incorpora el Impact Brake System.

Versatile soles, ideal for all types of terrain including stone, scree, grass, moss and mud. Ideal for running either in high humidity or on dry ground. incorporates the Impact Brake System.

Esta suela de altas prestaciones está indicada para el uso en terrenos duros y de roca. Mantiene un nivel de rendimiento óptimo incluso en terreno húmedo gracias a los tacos en forma VA usados en lugares cruciales de la suela que mantienen a raya el deslizamiento en las curvas. Con tecnología Morpho Dynamic.

High performance soles indicated for use on hard and rocky ground. They maintain optimum performance levels even on wet ground thanks to the 'VA' lugs used at crucial points on the sole which keep slipping in check on bends. With Morpho Dynamic Technology.

Esta suela está particularmente pensada para correr en terrenos blandos y con barro gracias al ancho del zapato y la distancia de los tacos que componen la suela. La suela puede combinarse con clavos.

These soles are particularly suited to racing on soft and muddy ground thanks to the width of the shoe and the distance of the lugs that make up the sole.

## 4] INJECTED AND COMPRESSION MIDSOLE

A number of La Sportiva Mountain Running® shoes use EVA injected midsoles which differ from the standard compression molded EVA midsoles for a high degree of cushioning and a better elasticity of the fabric. These features assist “push off” during the propulsion phase while running, making these models ideal for use on off-road trails. Furthermore, EVA injected midsoles drastically reduce the “squash” effect of the EVA over time, allowing the product to maintain the same characteristics and high performance for its entire duration.

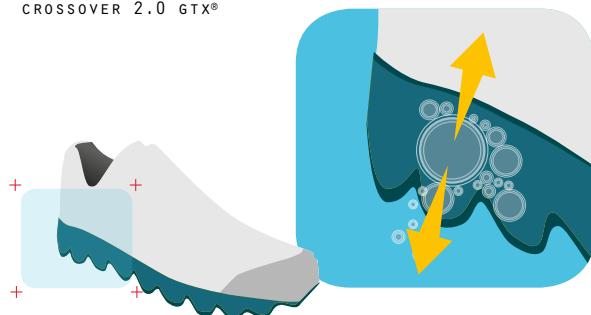

**Some La Sportiva models use standard compression molded EVA midsoles for the durability and reactivity on soft ground where the need for shock absorption is reduced.**

## 5] LA SPORTIVA INSOLE SYSTEM BY Ortholite®

**Los modelos de la colección Mountain Running adoptan las exclusivas plantillas La Sportiva By Ortholite, realizadas en dos espesores diferentes.**

Ambos modelos pueden encontrarse en la versión para hombres y para mujeres con materiales de diferentes densidades.

- + Mayor transpiración y elevado confort gracias a la ventilación plantar
- + Favorece la eliminación de sudor manteniendo el pie seco
- + Mayor duración en el tiempo gracias a una tecnología que evita la compresión excesiva del material
- + Tratamiento anti-bacteriano y lavable para una mayor higiene del pie

The mountain Running Models adopt the exclusive La Sportiva insoles by Ortholite, with 2 different thickness. Both models are available in men and women version and differs for the materials' densities.

- + Breathable for a cooler foot
- + The unique open cell structure creates a moisture management system
- + Long term cushioning: insole will retain over 95% of its thickness over time and won't flatten out
- + Anti-microbial agents and washable properties for a more hygienic shoe

## SHOES CHART

El mundo del trail running se caracteriza por las diferentes maneras de correr por montaña. Dependiendo del tipo de terreno, la distancia del recorrido, las condiciones climáticas y de la forma física del corredor, hay muchas maneras de interpretar el trail running. **Por eso mismo es tan importante la elección del calzado que te proporcione lo que necesitas y se ajuste a tu pie.** La Sportiva ha creado tres segmentos basándose en la distancia del recorrido y por tanto el tipo de uso. La Sportiva ha creado tres segmentos basándose en la distancia del recorrido y por tanto el tipo de uso.

The world of trail running is characterised by a series of very different approaches to off-road running. Depending on the type of ground, the length of the track, the climatic conditions and the fitness of the runner, there are many different ways to interpret off-road running. **It is therefore important to choose the boot that meets your demands and the shape of your foot.** La Sportiva has created 3 segments in the field of off-road running based on the distance of the track and thus the type of use intended.

## AKASHA NEW

Zapatilla de resistencia mountain running con una gran absorción a los impactos, diseñada para largas distancias, Ultra Maratones, Ultra Trails y para su uso en entrenamientos largos.

A mountain running endurance shoe with great shock absorption, designed for long distance trails, Ultra-Marathons, Ultra-Trails and for use on long training sessions.

- + Exterior en blando Slip-on, ajuste apretado y súper transpirabilidad en construcción tipo calcetín para evitar puntos de compresión y proporcionar el máximo confort
- + Volumen ancho diseñado para su uso para largas distancias y carreras de resistencia
- + Refuerzos frontales Dynamic ProTechTion™: proporcionan protección y estructura según el movimiento del pie para conseguir un movimiento dinámico y sin restricciones
- + Extra absorción a los impactos gracias a la plantilla Cushion Platform™ footbed
- + Soft Slip-on uppers, tight fit and super breathability with slipper sock construction to avoid compression points and to provide the maximum comfort
- + Wide volumes designed for long use during endurance competitions
- + Front active reinforcements Dynamic ProTechTion™: provide protection and structure following the foot movement in a dynamic way without constriction
- + Extra shock absorption thanks to the Cushion Platform™ footbed

## BUSHIDO NEW COLOURS

Un modelo técnico creado para el mundo de las competiciones de skyrunning. Super ligero, adherente y agresivo. Diseñado para garantizar la perfecta estabilidad en todo tipo de terreno, gracias a la construcción "STB Control", un nuevo concepto en el mundo de las zapatillas de montaña.

A technical, competition model designed for the sky running scene. Super lightweight, sticky and aggressive. Designed to guarantee perfect stability on holds on all types of off-road terrain thanks to the "STB Control" construction, a new concept in the world of mountain running shoes.

- + La estructura de TPU en los laterales llega a la media suela y la envuelve en la parte media del pie. Esto logra un ajuste más cómodo y una mayor estabilidad gracias a que la parte superior y la media suela trabajan a la vez en una unión perfecta
- + La zapatilla proporciona un apoyo excelente, contención en la parte media del pie y libertad de movimiento en los dedos
- + The uppers use an internal slip-on construction method which fits the foot like a sock without causing excessive pressure. The external shell in TPU wraps around the midsole to enhance stability, while maintaining the weight necessary to provide adequate structure to the shoe
- + The shoe provides maximum support, containment of the middle of the foot and freedom of movement at the toe

## HELIOS SR

Calzado ligero y minimalista dedicada al mundo de las sky races y competiciones verticales.

Lightweight, minimalist shoe dedicated to the world of sky races and vertical competitions.

- + Frente Flex-zone libre de obstáculos para facilitar el movimiento natural del pie
- + La malla superior en EVA proporciona una optima transpirabilidad y peso reducido
- + Tecnología con Entresuela Morpho Dynamic con Cuña de inyección en EVA, que permite que el calzado se ajuste todo tipo de terreno
- + Suela con doble mezcla: Aprovecha el gran agarre posterior para ayudar a empujar cuesta arriba y el agarre en cuesta abajo, amortiguante y durable
- + Rear, constriction free, Flex-zone to promote the natural movement of the foot
- + The EVA and Mesh uppers guarantee breathability and weight reduction
- + Midsole with Morpho Dynamic technology with injected EVA wedge that allows the shoe to adapt to all types of terrain
- + Dual density sole: grippy rear zone to promote the push in climb and hold downhill, shock absorbing and long lasting rear

## MOUNTAIN HIKING FOOTWEAR

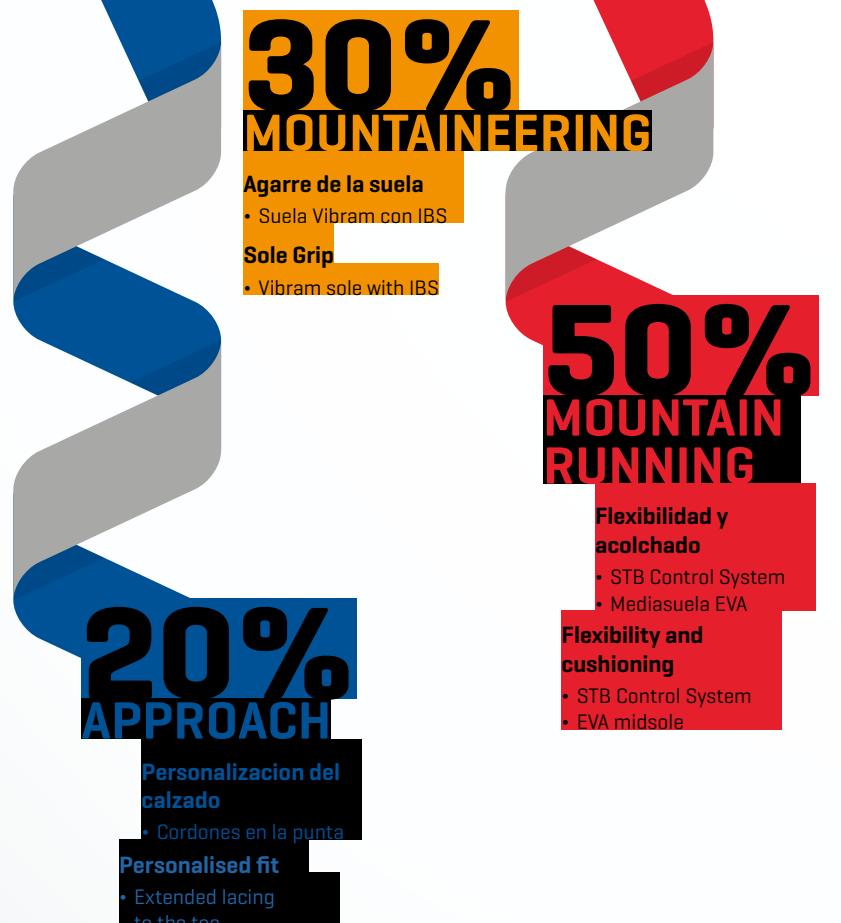

Línea Mountain hiking está dedicado a aquellos que les gusta ir a la montaña en caminos de tierra de una forma rápida, segura y cómoda. El trabajo de Investigación y Desarrollo representa la síntesis perfecta entre el ADN de La Sportiva.

The Mountain hiking line is dedicated to those who love to move rapidly and comfortably in the mountains, off the beaten track, in total safety. The hiking line is the result of the work carried out by La Sportiva's R&D department and represents the perfect synthesis of the company's DNA.

# THE IDEAL SYNTESIS OF LA SPORTIVA DNA

Tecnologías y soluciones de diseño derivados de los 3 cromosomas principales La Sportiva que trabajan sinéricamente dentro de esta línea.

Construction and technology solutions derive from La Sportiva's 3 main chromosomes that work in synergy in a line totally dedicated to the mountains.

## GORE-TEX® SURROUND™

The first all-round breathable and waterproof hiking shoe

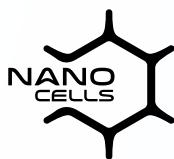

El proceso de síntesis de las mejores tecnologías al servicio en el del 'hiker' se complementa con la integración en el sistema de la exclusiva y única tecnología GORE-TEX® SURROUND™, membrana que garantiza la impermeabilidad y transpirabilidad sin precedentes. Por primera vez, de hecho, la superficie transpirable también se extiende a la parte inferior del pie para una transpirabilidad a 360°. Una capa especial resistente al agua y plantilla respirable en el lugar, permite que la humedad de la transpiración se evapore y contribuya a mantener el pie seco y confortable en un clima óptimo y dinámico.

Hiking shoes engineered with GORE-TEX® SURROUND™ product technology are designed for outdoor use in moderate to warmer conditions. They offer enduring waterproof protection and optimum breathability all around the foot. Moisture and warmth also escape through the GORE-TEX® membrane into the open structure of the "spacer" – and from there out of the shoe via side ventilation outlets. The result is faster sweat removal rate, keeping your feet dry and comfortable even at higher temperatures.

- Durably waterproof
- Highly breathable all around

## LA SPORTIVA NANO CELLS™

La línea de La Sportiva Mountain Hiking está realizada con la exclusiva tecnología Nano-Cells™: un tipo particular de construcción que consta de células que rodean a las partes superiores respirables del calzado, facilitando la salida de la humedad en la fase dinámica.

The La Sportiva Mountain Hiking line uses the exclusive Nano-Cells™ technology: breathable cells wrap around the uppers providing structure and allow humidity to be expelled during the dynamic phase.

ajustado, apto para su uso en competición  
tight fit for top race performance

# LAYERS SYSTEM

El sistema de capas de La Sportiva nos ayuda a identificar la ropa por categoría, donde cada capa tiene un particular beneficio. El sistema de capas alcanza la flexibilidad máxima y la adaptabilidad haga el tiempo que haga o la temperatura.

La Sportiva's Layers System helps us to identify garments by categorising them within a system of layers, where each layer denotes a particular benefit. Kitting out your technical wardrobe in terms of layers, achieves maximum flexibility and adaptability whatever the weather or temperature.

## BASE LAYER

**L1**  
Esta capa está en contacto directo con la piel. Esta por lo tanto debe de eliminar el sudor y mantener la piel seca para crear la comodidad óptima climática durante la actividad física.

This layer is in direct contact with the skin. It must therefore eliminate sweat and keep the skin dry to create optimum climatic comfort during physical activity.

## MID LAYER & PANTS

**L2**  
Esta segunda capa proporciona el aislamiento térmico en situaciones frías y ayuda a transferir la humedad del cuerpo lejos de la piel gracias a sus cualidades respirables.

Provides further thermal insulation and helps transfer body moisture away from the skin thanks to its breathable qualities.

## SOFT SHELL & HYBRID LAYER

**L3**  
La tercera capa térmica también ofrece protección parcial de la lluvia, el viento y la nieve manteniendo la máxima libertad de movimiento.

Third thermal layer which also offers partial protection from rain, wind and snow, but still allowing maximum freedom of movement.

## INSULATION LAYER

**L4**  
Capa térmica acolchada que mantiene la temperatura del cuerpo aún en climas sumamente fríos.

A thermal padded layer which maintains high body temperature even in extremely cold climates.

## HARD SHELL

**L5**  
Esta capa exterior protege con el viento, la lluvia y la nieve. Esto crea una barrera contra el entorno garantizando una superior transpirabilidad gracias al empleo de materiales con alta tecnología y membranas.

This external layer protects against wind, rain and snow. It creates a barrier against the environment while guaranteeing superior breathability thanks to the use of high tech materials and membranes.

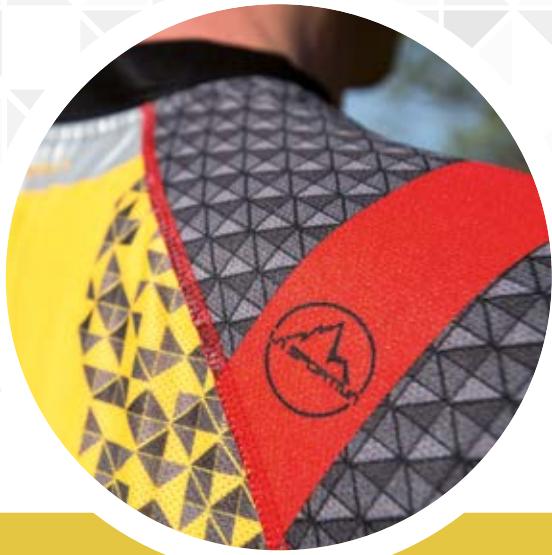

# MOUNTAIN RUNNING RACE COLLECTION

Cuando para cruzar la línea de meta faltan sólo unos pocos centímetros. En el momento en que te das cuenta de que lo has logrado, batiendo tu récord y superando límites y sin ceder un ápice. **Ese es el momento en que nacen a los productos de la Mountain Running® Race.**

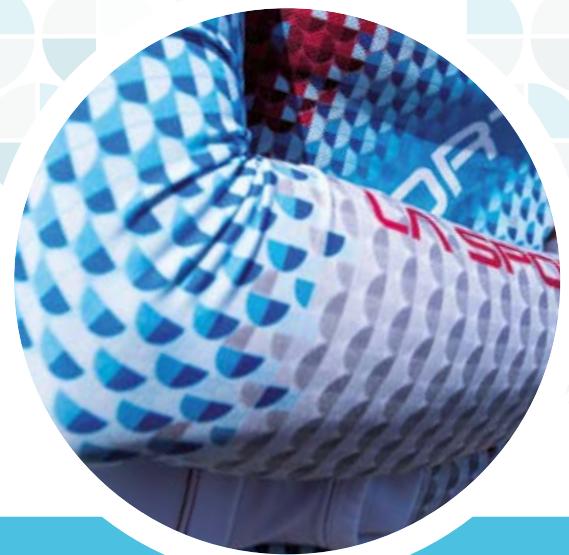

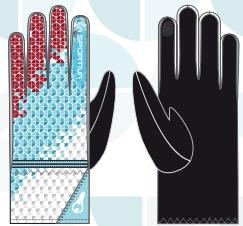

When you are just a few centimeters from the finish line. The moment when you feel you have pushed beyond your limits without sacrificing a single millimeter. **That is why the Mountain Running® Race Collection has been created.**

## VELOCITY TANK M bluesign® APPROVED NEW

**L1**  
ART. J43 BY  
BLACK / YELLOW

La Velocity Tank forma parte de la ropa oficial de La Sportiva Mountain Running Team y ha sido desarrollada usando materiales muy ligeros y transpirables, tratada con 3 diferentes componentes aprobados por la BlueSign®. HeiQ Adaptive mejora la regulación de la temperatura corporal y ofrece mayor rendimiento, mientras que el HeiQ Glide hacen el tejido más suave para evitar los problemas de roce con los pezones en distancias largas. Finalmente, el tratamiento en Polygiene® es anti bacteriano y anti mal olor corporal. Así como las costuras son planas para evitar las rozaduras y también incluye zonas reflectantes para mejorar la visibilidad.

The Velocity Tank is part of the official La Sportiva Mountain Running Team outfit developed using very lightweight and breathable fabrics, that are additionally treated with 3 different BlueSign® approved treatments. HeiQ Adaptive improves the body temperature regulation and allows a better performance, while HeiQ Glide makes the fabric more sleek to avoid the problem of bloody nipples when running for longer distances. And finally the Polygiene® treatment, that is antibacterial and anti-odor. Furthermore the tank is tailored with flatlock seams to guarantee chafe-free comfort and is featured with reflective applications for a better visibility.

- + Sistema de construcción Body Mapping
- + Impresión en sublimación
- + Anti-olor y anti-bacteria [Polygiene®]
- + Tratamiento anti-rozadura [HeiQ Glide]

## RUSH SHORT M NEW

**L2**  
ART. J45 BK  
BLACK

El pantalón corto Rush Short está específicamente diseñado para cumplir con todos los requisitos demandados por el atleta. La nueva construcción de la cintura ofrece varias posibilidades para guardar cosas y que se positionen sin que nos estorben cuando corremos. El short también incorpora un bolsillo trasero con cremallera y zonas reflectantes para asegurarnos una buena visibilidad. Fabricado en materiales super ligeros, ofrece elasticidad y protección óptima. El corte realizado en laser garantiza un gran confort.

The Rush Short is specifically designed to fulfill all requests an athlete can ask for. The newly developed waist construction offers several storage possibilities, that are positioned to not disturb when packed. The short is additionally featured with a zipper back pocket and reflective details to ensure a good visibility, while being active. The fabric combination is super lightweight, but offers at the same time the elasticity and protection that is needed. The laser-cut inner brief guarantees chafe free comfort.

- + 1 bolsillo Zip posterior

## ULTRA ARM WARMER M NEW

ART. J46 BY  
BLACK / YELLOW

Los mangos Ultra Arm Warmer nos protegen de las inclemencias meteorológicas y así nos olvidamos de llevar una chaqueta. Se ponen de forma fácil mientras corremos. El Arm Warmer incorpora zonas abiertas para poder ver el reloj, así como también nos cubre la mano. En la parte superior lleva una zona elástica de silicona y en la zona de las manos tiene un agujero para el pulgar.

The Ultra Arm Warmer allows you to react to different climatical situations without big problems and without the need to carry a complete long sleeve with you. You can easily put it on and off during your exercise or race. The Arm Warmer is featured with useful things, such as a flap opening, that allows you to have access to your watch, or a integrated hand cover, that can easily be folded over your hand in more colder conditions. On the top edge a silicon elastic keeps the sleeve in position, while on the lower edge this is done by the integrated thumbhole.

- + Agujero en el pulgar integrado
- + Guante térmico integrado
- + Apertura acceso rápido para el reloj
- + Banda de silicona en la parte superior interna
- + Impresiones en sublimación
- + Integrated thumbhole
- + Integrated hand cover
- + Flap opening for easy access to your sport watch
- + Silicon elastic on top edge
- + All-over sublimation print artwork

## GUARDIAN OVERPANT M

NEW

ART. J47 BK  
BLACK

Los pantalones Overpant destacan por ser flexibles y protegerse del viento y el agua. Se abren totalmente por el lateral con cremalleras para tener un fácil acceso, las piernas se ajustan en la parte inferior para que los pantalones no nos estorben cuando corremos. Fabricado con un peso de 25g/sqm y cuando los comprimimos su talla se reduce considerablemente, siendo tu compañero ideal para tus actividades.

The Guardian Overpant lives up to the name - flexible protection against wind and to a smaller degree also to water. With the full length side opener zippers you have easy access, while the pre-adjusted lower legs make sure that the pant does not disturb during your runs. With a fabric weight of 25g/sqm the weight and compression size is super reduced, so the ideal companion for your activities.

- + Zip integrado lateral
- + Sistema de regulación de la cintura

## PACE SHORT M NEW COLOURS

ART. J03 YE  
YELLOW

ART. J03 BK  
BLACK  
NEW

El Pace Short está fabricado con un tejido ligero, resistente y de secado rápido. La combinación del tejido sin costuras junto con la suave confección en la cintura, garantiza el 100% de libertad de movimiento. El forro suave y altamente transpirable nos brinda un gran confort, manteniendo la piel fresca, sin irritaciones y lejos de la humedad. Además el short incorpora un bolsillo de seguridad en el centro trasero y dos bolsillos de malla para guardar alimentos energéticos.

The Pace Short is made out of durable, lightweight and quick - drying woven fabric. The special developed "comfort waist construction" in combination with the split outseam ensure 100% freedom of movement. The soft and highly breathable liner provides chafe-free fit and the best moisture transport. Additionally the pant is featured with one center back safety pocket and two applied mesh pockets to stow power food.

- + Sistema de ventilación por mapeo-corporal
- + Confección suave en la cintura
- + Forro elástico con tratamiento anti-raspado
- + Tiro de la entrepierna 10 cm / 4 inch
- + Bolsillo de seguridad en el centro trasero
- + 2 Bolsillos de malla en la cintura para almacenamiento de comida energética
- + Body-mapped venting system
- + Soft waist construction
- + Elastic chafe-free liner
- + Inseam length 10 cm / 4 inch
- + Safety pocket on centre back
- + 2 applied waist pockets for energy food

**Fit:** Regular

**Fabric:**

## GUST SHORT M NEW COLOURS

Gust Short es un pantalón corto, esencial y hecho de tejido elástico ligero con costuras planas y anti-roce. Está equipado con sistema de ajuste rápido a la cintura y adopta un tejido con fibras de nylon [88%] lo que lo hace muy resistente. Cómodo y versátil.

The Gust Short has a very reduced construction and therefore the functional focus of the product is lightweight. The lightweight and stretchy outer fabric, the internal waistregulation system and the flatlock seams guarantee 100% freedom of movement. The pant is not only lightweight but offers as well a certain durability as the main fabric has a 88% of nylon. This pant is the right choice for all those that want to purely enjoy their activity.

- + Ligereza
- + Costuras planas y anti-roce
- + Regulacion interna en la cintura
- + Lightweight
- + Flatlock seam construction
- + Internal waist regulation

**Fit:** Regular

**Fabric:** [PWO4] 88% Nylon, 12% Elastane

## DUKE TIGHT SHORT M

El short Duke Tight está diseñado para aquellos corredores de montaña que exigen la máxima prestación técnica al material que van a utilizar. Gracias a las costuras planas, el corte atlético, y la confección suave en la cintura, este short garantiza el máximo confort protegiendo la piel del rozamiento y brindando el 100% de libertad en el movimiento. Durante las actividades realizadas en condiciones de baja visibilidad, las costuras reflectantes ayudan a mantener alerta a los conductores.

The Duke Tight Short is following the principles of correct fabric placement and is developed to meet the highest technical demand of endurance oriented mountain runners. For best possible support to improve performance, the material mix is produced using the best and long lasting qualities available on the market. Thanks to the athletic cut, the soft waist construction and the flatlock seams, this pant guarantees 100% freedom of movement and chafe-free comfort. Additionally the pant is featured with one center back safety pocket and two applied mesh pocket to stow power food. During activity in low light conditions, the reflective seams assist in alerting motorists to your presence.

- + Sistema de ventilación

## KIDO BERMUDA M NEW COLOURS

La Kido Bermuda posee un ajuste suelto y delicado que fue especialmente desarrollado para las necesidades de los excursionistas rápidos. Para lograr un producto de alta performance, se utilizó un tejido altamente elastizado y liviano que garantiza una perfecta libertad de movimientos. El sistema de ventilación trasero ofrece transpirabilidad y permite un rápido transporte de la humedad, para las actividades deportivas más intensas.

The Kido Bermuda is a more loose fit short pant specifically developed for the needs of fast hikers. For best possible support to improve performance the pant is produced using a light and very stretchy fabric, which guarantees a perfect freedom of movement. For more athletic activities the back ventilation system offers breathability and allows a fast moisture transport. Featured with 2 front pockets, 1 side zip pocket and a special topo-card pocket, a maximum of storage possibilities is given.

- + Banda de ventilación posterior
- + Bolsillo porta mapas

## EXPLORER SHORT M NEW

Los Explore Short son la versión corta de los pantalones Orion con las mismas especificaciones. Incorpora zonas elásticas y destaca por su gran durabilidad, siendo el pantalón que cualquier runner necesitaría. Incorpora dos bolsillos frontales con cremallera, un bolsillo trasero con cremallera, cintura elástica, así como beltloops para llevar un cinturón.

The Explorer Short is the short version of the Orion Pant and is featured with the same fast hiking specific details. To ensure 100% freedom of movement and comfort for all activities, the fabric is lightweight and very stretchy. Beside this the short has a half elastic waist construction. 2 front zipper pockets and one rear zipper pocket offer storage possibilities. The beltloops offer the opportunity to wear it together with one of our La Sportiva belts.

- + Integra gancho para llaves
- + Bolsillo frontal con cremallera
- + 1 bolsillo con cremallera en la parte posterior
- + Rodilleras preformadas
- + Cintura elástica
- + Ajuste de la parte baja
- + Beltloops para el cinturón

Main: [DW06] 85% PA, 15% SP  
**Sizes:** S/XXL  
**Weight:** 220 g [L]

## TITAN PANT M NEW COLOURS

El pantalón Titán Pant es el hermano mayor de las Bermudas Kido. Específicamente diseñado y desarrollado para excursionistas rápidos, el pantalón posee 2 bolsillos frontales, 1 bolsillo con cremallera, 1 bolsillo lateral con cremallera detrás y un bolsillo especial porta-mapa. Esto le da grandes posibilidades de almacenamiento. El pantalón sigue las reglas de mapeo corporal usando dos tipos tejidos, también satisface todas las necesidades requeridas, tales como la durabilidad, libertad de movimiento y transpirabilidad.

The Titan Pant is the big brother of the Kido Bermuda. Specifically engineered and developed for fast hikers. This gives you a maximum of storage possibilities. Using 2 different fabrics, the pant follows the rules of body mapping and satisfies all requested needs, such as durability, freedom of movement and breathability. The pant is completed by the following detail solutions: reinforcement print on inner leg, pre-shaped knee part and an adjustable bottom hem construction.

- + Bolsillo porta llave integrado
- + Bolsillo lateral con cremallera
- + Bolsillo porta-mapas
- + Sistema de regulación rápida en la botamanga
- + Reforzado en la parte interna de las piernas
- + Rodillas engomadas

## LOKI PANT 2.0 M NEW

El Loki Pant es un pantalón de guía de estilo ligero y versátil que puede ser utilizado para la escalada alpina o el esquí de montaña. Los puños elásticos de sujeción trabajan con botas de montaña o botas de esquí. La construcción híbrida a prueba de viento el softshell transpirable sobre las rodillas y X2Weave-MAX™ en los paneles laterales, aminorando el desgaste que la escalada en roca puede lograr.

The Loki Pant is a versatile lightweight guide-style pant that can be used for alpine climbing or ski mountaineering. The gripper elastic cuff s work with mountain boots or ski boots. The hybrid construction puts windproof breathable softshell over the knees and X2Weave-MAX™ on the side panels to handle the abuse that rock climbing can dish out.

- + Bolsillo en el lateral derecho
- + Bolsillo con cremallera en el lado izquierdo
- + Confección cómoda y ajustable en la cintura
- + Aplique de silicona en el dobladillo interior de la pierna
- + Cremallera en el dobladillo de la pierna
- + Rodillas articulables pre-formadas
- + Forro MicroLiteFleece en la parte frontal superior para mayor calor y comodidad
- + Pocket on right side
- + Zipper pocket on left side
- + Soft waist construction
- + Integrated glove clip in left zipper pocket
- + Zipper opening on leg hem
- + Adjustable waist construction
- + Elastic silicon tape on inner leg hem

## CRUX TIGHT 3/4 SHORT W bluesign® PRODUCT

NEW COLOURS

Las calzas Crux Tight son la combinación perfecta entre la tecnología sin costuras y el material elástico a 4-vías, brindando una mayor comodidad y proporcionando una total libertad de movimiento, ya que han sido diseñadas siguiendo las reglas de mapeo corporal. El tejido utilizado garantiza una óptima transpirabilidad y una perfecta eliminación de la misma. El tratamiento con Polygiene® logra que las calzas sean anti-bacterianas y anti-olor. Todas estas características hacen que combinándolas con las Bermudas Zen, sean el traje perfecto para los días fríos de verano.

The Crux Tight combines seamless technology and 4-way stretch for comfort and a full range of motion. With the body engineered design and the body mapping construction the pant allows perfect breathability and moisture transport. The Polygiene® treatment makes the pant anti-bacterial and anti-odor. Having this in mind the logical consequence is the combination with the Zen Bermuda, which gives you the perfect outfit for cooler summer days.

- + Tecnología sin costuras para mayor confort y menor irritación

## FLURRY SHORT W NEW COLOURS

Flurry Short es un pantalón corto femenino, esencial y ligero, hecho con un tejido elástico, con costuras planas y anti-roce. Está equipado con un sistema de ajuste rápido en la cintura y adopta un tejido con fibras de nylon [88%] lo que lo hace muy resistente. Cómodo, versátil y muy femenino.

The Flurry Short has a very reduced construction and therefore the functional focus of the product is lightweight. The lightweight and stretchy outer fabric, the internal waistregulation system and the flatlock seams guarantee 100% freedom of movement. The pant is not only lightweight but offers as well a certain durability as the main fabric has a 88% of nylon. This pant is the right choice for all those that want to purely enjoy their activity.

- + Costuras planas y anti-roce
- + Regulacion interna en la cintura
- + Flatlock seam construction
- + Internal waist regulation

Fit: Regular

Fabric:

PW04: 88% Nylon, 12% Elastane

Sizes: XS/XL

Weight: 107 g [M]

## SUPERNOVA SHORT W NEW

Este short destaca por su ligereza y funcionalidad, construida siguiendo las principales directrices de las mountain runners más exigentes. Incorpora cintura en materiales suaves, bolsillo con cremallera. Tu compañero ideal para la próxima salida.

This Short is using very lightweight and functional fabrics, that are constructed following the principles of body mapping to guarantee an optimal performance. Featured with nice details such as a soft waistband construction and a safety zipper pocket in CB, this pant is the perfect companion for your next run.

- + Sistema construcción Body Mapping
- + Construcción cintura suave
- + Slip interno integrado
- + Bolsillo de seguridad

## SKADI 2.0 PANT W NEW

ART. C50 BE  
BERRY

ART. C50 BK  
BLACK

ART. C50 FJ  
FJORD

Pantalón de corte femenino, versátil y de estilo ligero que puede ser utilizado para la escalada alpina o el esquí de montaña. Construcción híbrida con tejido softshell en las rodillas y X2Weave-MAX™ en los paneles laterales para evitar roturas o cortes por el roce con el hielo o las rocas. La tela X2Weave-LT™ fue desarrollada por La Sportiva para ser lo más liviano, repelente al agua y fácil de transportar.

The Skadi 2.0 Pant is a versatile lightweight guide-style pant that can be used for alpine climbing or ski mountaineering. The gripper elastic cuffs work with mountain boots or ski boots. The hybrid construction puts windproof breathable softshell over the knees and abrasion resistant fabric on the side panels to handle the abuse that rock climbing can dish out.

- + Bolsillo en el lateral derecho
- + Bolsillo con cremallera en el lado izquierdo
- + Confección cómoda y ajustable en la cintura
- + Aplique de silicona en el dobladillo interior de la pierna
- + Cremallera en el dobladillo de la pierna
- + Rodillas articulables pre-formadas
- + Forro MicroLiteFleece en la parte frontal
- + Map pocket on right side
- + Zipper pocket on left side with internal lanyard
- + Comfortable adjustable waist construction with zipper fly is designed for wearing with a harness
- + Elastic/silicon gripper tape on inner leg hem
- + Zipper opening on leg hem
- + Articulated pre-shaped knees
- + Brushed MicroLiteFleece lining on upper front part

## SIREN 2.0 HOODY W

Híbrido crossover entre L3 y L4 gracias al forro térmico SILVER PrimaLoft® ECO en el frente, la espalda y en las bandas laterales secundarias en Polartec, suave y elástico para una máxima comodidad y libertad de movimiento. Creado para satisfacer los excursionistas exigentes que buscan un producto tan cómodo cálido y capaz de facilitar los movimientos más extremos durante la actividad. La construcción exclusiva SPIREX™ (compuesto por un tejido doble y relleno) hace que sea muy transpirable.

The combination of Primaloft® SILVER Eco, a fleece material and a double weave makes this a very technical hybrid piece that meets all the requirements during your mountain activity. The exclusive SPIREX construction make it so breathable and protective at the same time.

- + Relleno: PrimaLoft® SILVER ECO
- + Capucha con regulación rápida con una mano
- + 2 bolsillos delanteros con cierre
- + Bolsillo interno con cierre porta teléfono
- + Tejido 4-Way stretch
- + Construcción thumbhole Integrado
- + Banda de silicona elástica en la cintura
- + Capucha con visera en neopreno integrado
- + Construcción en SPIREX™ transpirable
- + Built in hood
- + Single hand hood adjustment system
- + 2 front hand pockets with zip
- + 1 inner zipper phone pocket with headphone port
- + Integrated thumbhole construction
- + Pilling and fading resistant
- + Silicon elastic on bottom part
- + Integrated neoprene visor on hood
- + Very breathable SPIREX™ construction

**Fit:** Regular

**Fabric:**

NUGGET NEW

Chaqueta de doble capa impermeable super-ligero, elástico y transpirable dedicado a las mujeres. Con paneles de ventilación debajo de los brazos que permiten un ajuste óptimo y el confort climático. Extremadamente compactable y se puede almacenar fácilmente en la mochila durante las travesías, gracias a su bajo peso de 178 g. Funcional, protector y packable y tiene tratada para garantizar un impermeable y transpirable.

The Hail Jacket is a super lightweight product that offers pure function. The fabric combines all needed elements to protect your body and offers high breathability, high waterproofness [20.000mm] and is at the same time also elastic. The breathability combined with a specific underarm ventilation perfectly supports the body climate regulation and avoids a wet feeling during your activity. With a total weight of 158g and a very small compression size this jacket is for all those that are searching for a highly functional all weather protection piece.

- + A prueba de agua [columna de agua de 20.000mm]
- + Capucha integrada
- + Bolsa interior
- + Packable
- + Zona de ventilación debajo de los brazos
- + Waterproof [20.000mm]
- + Hood for maximum protection
- + Integrated stow pocket

# MATERIAL INDEX

Sensitive®

Los Tejidos Sensitive® representan la excelencia en la industria de la ropa, ya que combina la funcionalidad y la técnica como pocos en el mercado. Son extremadamente livianas y transpirables, pero también resistentes y protectoras contra los elementos.

- + Asegurar una perfecta transpiración
- + Asegurar un ajuste perfecto y el mantenimiento de al mismo tiempo de una perfecta imagen
- + Se secan muy rápidamente
- + Proporcionar 50 + protección contra los rayos UV

Sensitive® fabrics are unequalled for the design of sports garments, because they marry excellent technical functionality with techniques of application. Sensitive® fabrics are incredibly light and breathable, resistant and protective against external agents. The extraordinary qualities of Sensitive® fabrics offer numerous advantages much appreciated by those who do active sport at highest level.

- + Ensuring perfect breathability and greater coolness
- + Offering excellent wearability and perfect retention of shape
- + Drying twice as quickly
- + Guaranteeing a high UV protection [SPF 50 +]

PrimaLoft® Gold Insulation

Es microfibra aislante por excelencia. Las ultrafinas fibras son sometidas a un tratamiento especial en un proceso patentado y luego se combinan para formar un núcleo aislante que es increíblemente suave, ligero y resistente al agua. Se absorbe 3 veces menos agua, es 14% más caliente cuando se seca y 24% de humedad, en comparación con otros materiales de aislamiento en el mercado.

is the highest performing insulation on the market for warmth, water resistance, softness and compressibility. PrimaLoft® Gold Insulation is an ultra-fine microfiber insulation that is as warm, soft and lightweight, and is warmer wet or dry than all other insulations.

PrimaLoft® Silver Insulation

Tela en Microfibra de aislamiento con un excelente rendimiento diseñado para asegurar un alto grado de calor, resistencia al agua, la suavidad y compactable. Silver PrimaLoft® Insulation te mantiene caliente, seco y cómodo, incluso en condiciones extremas.

Premium performance insulation engineered for superior warmth, water resistance, loft, softness and compressibility. PrimaLoft® Silver Insulation insulation keeps the body warm, dry and comfortable, even in extreme conditions.

EctoShell™

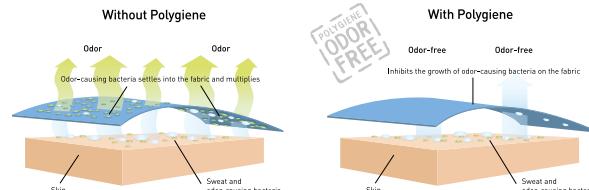

The protection of a shell, the breathability of a soft shell. Water resistant, breathable, windproof fabrics that use eco friendly materials. These garments are divided on the basis of weight.

Polygiene®

Polygiene® es un tratamiento activo con sales de plata antibacteriano y anti-olor. Diseñado para mantener la prenda fría y favorecer la eliminación de sudor en contacto con la piel, se aplica a los productos utilizados por la gente que es dinámica y activa.

Polygiene® è un trattamento attivo ai sali d'argento anti-batterico ed anti-odore. Concepito per mantenere i capi freschi e favorire lo smaltimento del sudore a contatto con la pelle, è applicato su prodotti utilizzati da persone dinamiche ed attive.

PrimaLoft® Silver Insulation Hi-Loft

Tejido avanzado de aislamiento continuo diseñado para asegurar un alto grado de calidez y suavidad. Construido con fibras de filamento continuo fino y ultrafino. El resultado de esta red de fibras es un tejido aislante que eleva el nivel de rendimiento.

Advanced multi-denier continuous filament insulation engineered for superior warmth, softness and loft. PrimaLoft® Silver Insulation Hi-Loft is constructed of both fine and ultra fine denier continuous filament fibers. This fiber composition results in an insulation that raises the performance bar of continuous filament insulations.

PrimaLoft® Gold Insulation Eco

PrimaLoft® Gold Insulation Eco tiene excelentes propiedades aislantes y fue creado para mantener un alto rendimiento, incluso después de muchos usos y compresiones. Hecho al 90% con fibras derivadas de la transformación de botellas de plástico recicladas que le permiten mantener la temperatura perfectamente respetando el medio ambiente.

PrimaLoft® Gold Insulation Eco offers best-in-class insulation designed for repeated compression and durability over time. Featuring 90% post-consumer recycled fibers made from plastic bottles, our unique low-bulk construction maintains loft and continues to trap body heat even when compressed.

EKS by Pontetorto®

Pontetorto is an Italian company based in Prato that produces innovative, high-quality fabrics. The EKS fabric, made from merino wool (40%) and polyester (60%), generates heat during the dynamic phase because it works with the perspiration of the athlete. Instead of transporting the moisture as quickly as possible to the surface to evaporate and provide a cooling, the effect here is to use the physical transfer phase to generate heat.

### HeiQ Glider

Experience your true range of motion with Glider by HeiQ. This smart Swiss technology helps to reduce the friction between the textile and your skin – giving you unlimited freedom to move. With Glider, textiles feel smooth, offering the ultimate in comfort.

### HeiQ Adaptive

Feel cool in all conditions with Adaptive by HeiQ. This unique Swiss technology responds to your body temperature and perspiration – keeping you cool when the heat is on. Adaptive technology is intelligent and dynamic, so you stay comfortable and dry around the clock.

### Polartec® Power Stretch® Pro™

El tejido Polartec® Power Stretch® Pro™ es muy elástico debido a la construcción de 4-way stretch y transpirable. Esto ayuda a mantener el cuerpo seco gracias a las excelentes propiedades de secado rápido. La estructura de 2 capas incluye una capa exterior de nylon resistente al viento y resistente a la abrasión, junto con una capa interna de poliéster suave que absorbe el sudor lejos de la piel lo que contribuye al secado rápido. Polartec® Power Stretch® Pro™ es la tela perfecta para su uso en contacto con la piel.

Polartec® Power Stretch® Pro™ fabrics feature body-hugging 4-way stretch and are very breathable. These fabrics feature a proprietary construction with two unique surfaces: a durable nylon outer layer is wind and abrasion resistant; the soft polyester inner layer pulls moisture away from your skin keeping you dry, warm and comfortable. The fabrics excel at handling the demands of the next-to-skin environment.

### GORE-TEX®

El logo de la marca GORE-TEX® garantiza la máxima calidad y una protección óptima, incluso con las condiciones climáticas más extremas. Es por eso que para las expediciones profesionales en las regiones más frías de la tierra y húmeda se eligen los productos diseñados con GORE-TEX®. El estricto control de calidad de los productos GORE-TEX® garantizan no sólo el laminado GORE-TEX®, sino de toda la prenda GORE-TEX® realizados por nuestros socios fabricantes. Todas las prendas de vestir GORE-TEX® satisfacen los estándares de producción y ofrecen la garantía de impermeabilidad GORE-TEX® GUARANTEED TO KEEP YOU DRY™.

Your guarantee of highest quality and maximum protection even in the most extreme weather. Which is why on professional expeditions to the coldest and wettest regions on earth, GORE-TEX® fabrics are the products of choice. The GORE-TEX® product control program guarantees the performance not only of the GORE-TEX® fabric but of all finished GORE-TEX® outerwear made by our manufacturing partners. The results are strict performance and manufacturing standards for all GORE-TEX® garments – and the GUARANTEED TO KEEP YOU DRY™.

### 2-Layer GORE-TEX® Active Products

La ropa diseñada con la tecnología GORE-TEX® Active es extremadamente transpirable y es ideal para actividades aeróbicas de alto impacto llevadas a cabo durante el día. Este tipo de ropa es impermeable y resistente al viento y transpirable. GORE-TEX® Active en 3 capas. El GORE-TEX® Active Shell combinan un GORE-TEX® más ligero y delgado en un tejidos de alto rendimiento y ligero para llevar a cabo una solución avanzada de 3 capas que se adapta al consumidor activo. Gracias a una tecnología de laminado patentado, en el interior del soporte del tejido de la prenda se integra directamente en la membrana GORE-TEX® y asegura transpirabilidad extrema y es muy confortable sobre la piel.

GORE-TEX® Active laminates combine a lighter, thinner GORE-TEX® membrane with fine denier performance textiles to deliver the ultimate 2-layer solution for the active consumer. On the liner side, a proprietary lamination technology integrates the backer textile directly into the GORE-TEX® membrane allowing for extreme breathability and excellent next to skin comfort.

# FABRIC INFO

## FEATHER WEIGHT FABRICS

FABRIC CODE	CATEGORY	COMPOSITION	TREATMENTS / FEATURES			COLOUR FASTNESS	ABRASSION RESISTANCE	FABRIC WEIGHT
NY05	RIP STOP	100% nylon 12D	DWR	X	down proof coating		3-4	4 grade [20.000 cycles]
NY06	RIP STOP	57% PA, 43% PES 17D	PD	DWR	breathable down proof coating		3-4	4 grade [20.000 cycles]
TFA03	NYLON	100% nylon 30D	PD	DWR	X		3-4	4 grade [20.000 cycles]

## FLEECE FABRICS

FABRIC CODE	CATEGORY	COMPOSITION	TREATMENTS / FEATURES			COLOUR FASTNESS	ABRASSION RESISTANCE	ELASTICITY	FABRIC WEIGHT
