TECHNICAL GLOSSARY

WAVE TECHNOLOGY

	<p>Parallel Wave Wave technology which uniformly disperses shock throughout the sole, providing excellent cushioning and enhanced stability.</p>		<p>Fan-shaped Wave Wave technology which features various Wave heights, delivering excellent cushioning and stability that corrects excess of pronation.</p>	<p>A unique technology that combines the two key elements which make great running shoes - cushioning and stability. Mizuno have created a Wave to suit every type of runner.</p>
	<p>Infinity Wave: Wave technology with a more visible and effective construction. Two parallel plates that sit together with soft cushioning pillars in-between to provide unrivalled cushioning and improved durability by absorbing and dispersing the impact at foot strike.</p>		<p>Double Fan-shaped Wave Wave technology that gives the highest levels of support combined with excellent cushioning. An additional Wave platform is added on the medial side to enhance pronation correction.</p>	<p>Running places stress on the body. The unique Mizuno Wave technology provides the right amount of cushioning and stability your body needs and blends these elements, creating a smooth and easy running experience.</p>

ALL SPORTS

	<p>Inspired by nature, Wave is a unique midsole technology that provides both cushioning and stability. Wave's unique shape dissipates impact forces away from the floor for a smoother, more cushioned feel on every step.</p>		<p>Breathable and Cool, AIRmesh allows each running shoe from Mizuno to maintain a high standard of breathability and comfort of the upper.</p>
	<p>The Dynamotion Fit system uses highly advanced motion capture and biomechanics technology. Mizuno has developed a design blueprint to engineer shoes that work with your foot throughout the gait cycle.</p>		<p>A shock-absorbing cushioning compound</p>
	<p>Cool and Dry. Mizuno Intercool solves the problem of heat and humidity build-up in a running shoe. It does this by incorporating a full-length ventilation system in the sole of the shoe that removes heat and humidity from the foot through a system of ventilation channels.</p>		<p>Anatomically moulded insock for comfort and cushioning.</p>
	<p>An advanced lightweight cushioning material that absorbs shocks and keeps the transition smooth and fast due to its quick rebound properties.</p>		<p>A high-grade removable insock for comfort and cushioning.</p>
	<p>ap+, a lightweight midsole compound offering rebound and cushion durability, providing a high level of comfort.</p>		

RUNNING TECHNOLOGIES

	Durability and Traction. Xt-10 provides extremely durable Mizuno carbon rubber that allows for longer wear in high impact areas and provides more traction at the heel strike.		An engineered approach to minimise the rapid acceleration and deceleration of the foot during transition, creating the smoothest ride possible.
	XtaRide, Mizuno's technical trail concept featuring X lugs and Xta groove, leading to trail shoes that adapt to their surroundings and work in perfect harmony with the body.		A lightweight midsole compound providing high level cushioning and rebound for energy efficient runs.
	Breathable and Dry. Coated mesh providing water resistance and breathability for Mizuno's Running shoes.		Bi-Directional outsole rubber combined with synthetic leather compound. Breaks through water, improving grip in all conditions.
	G3, an advanced performance outsole component that enhances traction where needed most and reduces weight.		Wave Plate constructed from Pebax Rnew™, a sustainable compound made from plant based oil and low carbon production, while retaining high performance characteristics.
	A unique midsole compound providing high comfort and performance, while being extremely lightweight.		An evolutionary lightweight midsole that delivers stress-free cushioned rides with high rebounds. U4iCX for an energised, euphoric and super-comfortable run.

FOOTBALL TECHNOLOGIES

	Upper delivers a high level of softness and durability with a structured		K-Leather provides a quilted, luxurious feel and enhanced sense of touch, whilst offering a secure fit.
---	--	--	---

INDOOR TECHNOLOGIES

	A specifically engineered diagonal groove in the midfoot area allows the player to turn at maximum speed and power by efficiently transferring natural body movement and shift in direction.		An exceedingly lightweight midsole material with excellent comfort and resilience properties. Same bounce properties as AP+, but 10% lighter in weight.
	A performance outsole component that enhances traction where needed most.		Dynamotion Groove - an innovatively constructed outsole using specifically designed flex grooves to improve stability and on court agility.

TENNIS TECHNOLOGIES

	A unique upper providing the highest level of softness and durability, while maintaining breathability.		A specifically engineered diagonal groove in the midfoot area allows the player to turn at maximum speed and power by efficiently transferring natural body movement and shift in direction.
---	---	---	--

APPAREL TECHNOLOGIES

	<p>Mizuno DryLite technology draws excess moisture away from the body, creating a comfortable and dry microclimate for best performance.</p>		<p>Mizuno FreshPlus technology adds an anti-bacterial and deodorising function to your garment, creating a fresher and odour reducing product.</p>
	<p>Mizuno Bodymapping technology provides enhanced air circulation inside the garment, keeping the body cool and dry.</p>		<p>Mizuno Dynamotion technology is based on anatomical research to create patterns that give improved garment fit and full freedom of movement.</p>
	<p>Mizuno's BIOGEAR is based on in-depth scientific research into the human exercise physiology and biomechanics. It helps to maintain body balance, improve performance and reduce the fatigue of muscles and joints during sport by controlling stretch, pressure and shape.</p>		<p>CoolTouch technology provides a soft feeling and leads to extremely quick drying. DryLite CoolTouch™ fabric moves body heat from the skin, keeping the body cooler.</p>
	<p>Mizuno ImpermaLite technology provides a performance blend of water and wind protection combined with superior breathability.</p>		<p>BlindStitch construction provides flat seams for anti-abrasion and enhanced comfort.</p>
	<p>NightLite, with its reflective material, provides superior retro reflection for low light running.</p>		<p>Mizuno Intercool® technology provides a body cooling effect through superior moisture management and evaporation using a lightweight microyam knit, engineered to enhance airflow.</p>
	<p>Breath Thermo is an extremely innovative thermal fabric yarn. It captures escaping body heat and, through a patented reaction in the yarn, generates heat-returning warmth to the body.</p>		<p>Mizuno Warmalite technology recycles body heat, creating an insulating warm layer between body and garment.</p>
